

# ASSIGNMENT 11

## Teacher and Student Registration Using Express.js and MongoDB

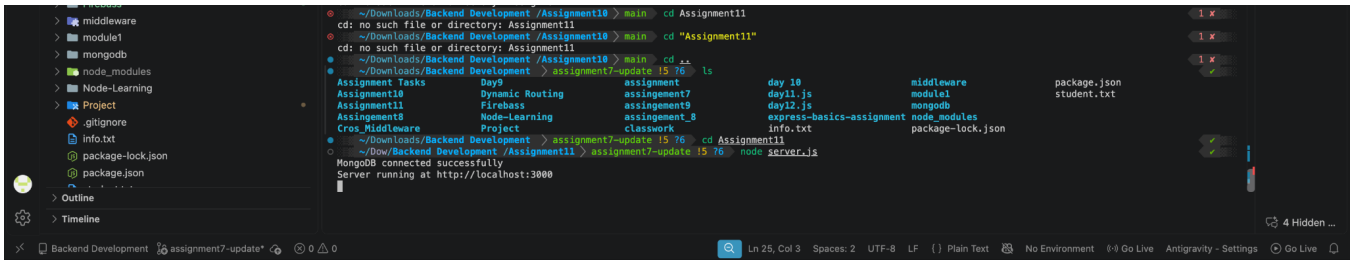

### Submission Evidence

This PDF contains the available implementation and verification screenshots for Assignment 11. The application uses Express.js, Mongoose, separate teacher/student schemas, models and routers, registration endpoints, validation, bcrypt password hashing, and MongoDB collections.

| Required Evidence                 | Included |
|-----------------------------------|----------|
| 1. MongoDB Connection             | Yes      |
| 2. Teacher Registration — Postman | Yes      |
| 3. Student Registration — Postman | Yes      |
| 4. Teacher Data — MongoDB         | Yes      |
| 5. Student Data — MongoDB         | Yes      |
| 6. Folder Structure               | Yes      |

# 1. MongoDB Connection

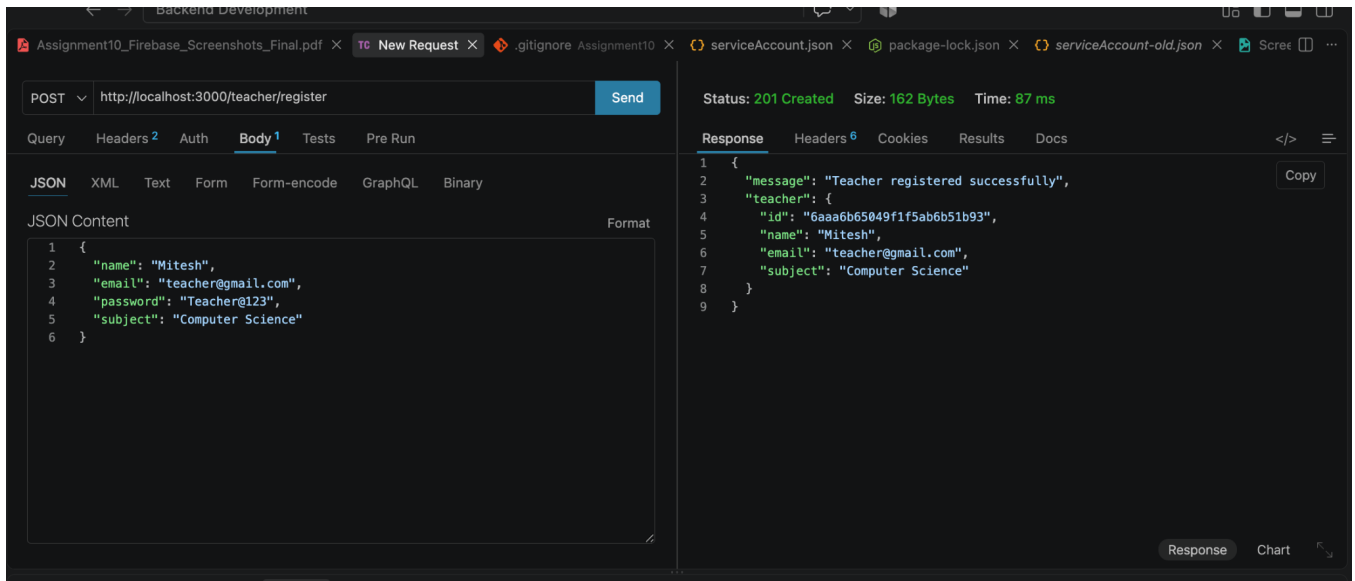

Successful MongoDB connection and Express server running on port 3000.

```
~/Downloads/Backend Development /Assignment10 > main cd Assignment11
cd: no such file or directory: Assignment11
~/Downloads/Backend Development /Assignment10 > main cd "Assignment11"
cd: no such file or directory: Assignment11
~/Downloads/Backend Development /Assignment10 > main cd ..
~/Downloads/Backend Development > assignment7-update 15 76 ls
Assignment Tasks      Day9      assignment      day 10      middleware      package.json
Assignment10          Dynamic Routing  assignment7      day11.js    module1         student.txt
Assignment11          Firebase    assignment9      day12.js    mongodb
Assignment8           Node-Learning assignment8      express-basics-assignment node_modules
Cros_Middleware       Project     classwork       info.txt    package-lock.json
~/Downloads/Backend Development > assignment7-update 15 76 cd Assignment11
~/Downloads/Backend Development /Assignment11 > assignment7-update 15 76 node server.js
MongoDB connected successfully
Server running at http://localhost:3000
```

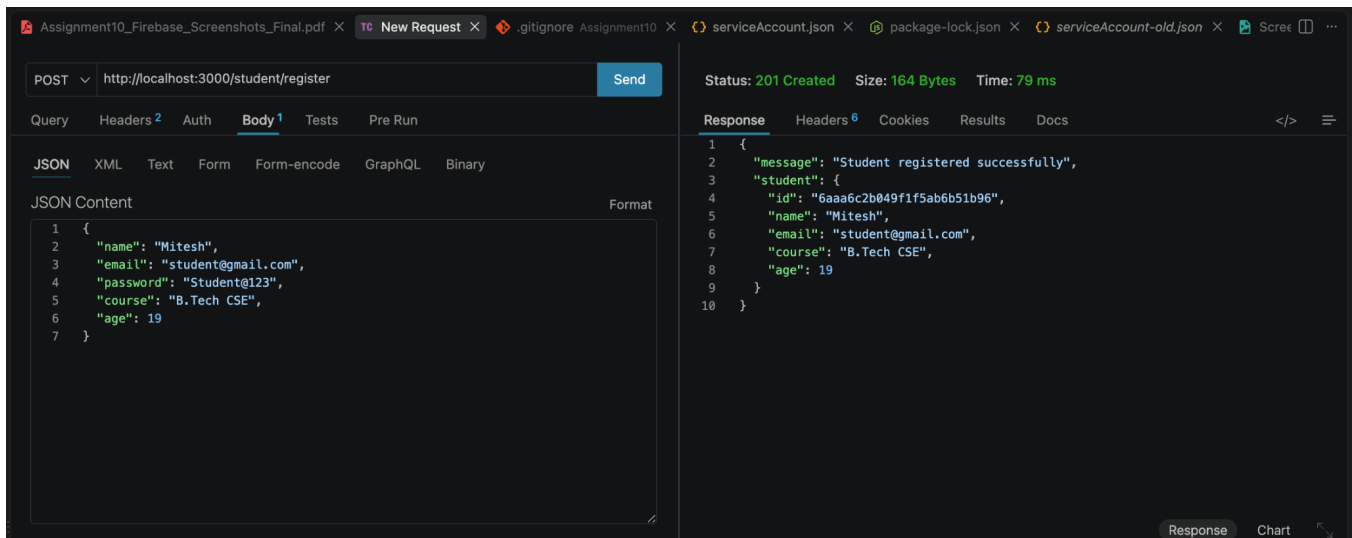

## 2. Teacher Registration — Postman

POST /teacher/register returned 201 Created with the teacher registration response.

### 3. Student Registration — Postman

POST /student/register returned 201 Created with the student registration response.

## 4. Teacher Data — MongoDB

teachers collection showing stored teacher records and bcrypt-hashed passwords.

The screenshot shows the MongoDB Compass interface. On the left, the 'CONNECTIONS (4)' panel lists several connections, with '127.0.0.1:27017' selected. Under this connection, the 'teachers' collection is highlighted. The main panel displays the 'teachers' collection in the 'assignment11' database. The 'Documents' tab is active, showing two documents. Each document contains fields for \_id, name, email, password (bcrypt-hashed), subject, createdAt, and updatedAt. The first document is for 'Mr. Sharma' (Math teacher) and the second is for 'Hitesh' (Computer Science teacher).
